LX-1817 Adjustable Oil Filter Wrench

The slim and adjustable design fits where other handled wrenches would not.

Fort Mill, SC - The LX-1817 is a slip joint oil filter wrench made from high carbon drop forged steel construction for strength and durability. The slip joint handle allows for a greater range to grab the filter. The slim and adjustable design fits where other handled wrenches would not. The dual-handle allows for better leverage to bear down hard to remove stubborn tight filters. The sure-grip jaw teeth prevent slipping on the filter. The non-grip handle provide comfort and a sure grip. The slip joint handle allows for greater range to grab onto the filter. The LX-1817 fits filters from 3-5/8 in. to 6 in. (92mm-152mm). The filter wrench is blackened for resistance to rust, oxidation and corrosion that will provide the filter wrench a longer life. Popular applications for this filter wrench is to stand up to the high torque needed to remove filters from trucks, tractors, and other heavy equipment. It fit most truck and tractor oil filters including Case, Caterpillar, Cummings, Detroit Diesel, John Deere, Mack and other heavy equipment.

Warning: Comfort vinyl grip are only for comfort and are not recommended for electrical use.
