New Cap Type Oil Filter Wrenches

Removes Hard to Reach Oil Filters

Fort Mill, SC - Lumax's cap type oil filter wrenches easily and safely remove hard to reach oil filters with fluted ends. Strong and durable, they provide a high torque capacity to remove even the most stubborn filters and will not damage or crush the filter. Use with a 3/8" square drive ratchet and extension with Lumax's cap type filter wrenches.

The LX-1850 (3") & LX-1851 (3 3/4") are zinc-plated to resist rust and corrosion. They fit various flute designs found on AC/Delco, Fram, Gard, Motorcraft, NAPA, Sears, Step, Wix, and other filters. Both models have 15 flutes.

The LX-1852, LX-1853, LX-1854, & LX-1855 are black powder coated finish to resist rust and corrosion. Precision-stamped, durable steel construction that stands up to long-term repeated use. These filter wrenches range in size from 65mm to 93mm.

Note: Do not use these filter wrenches with power tools. Be sure the fluted end of the filter matches up with the wrench.
