LX-1328 Lever Action Chemical Pump

New Corrosion Resistant Chemical Pump

Fort Mill, SC - The LX-1328 is the new corrosion resistant chemical pump from Lumax. The pump is designed for a fast transfer of acidic solutions, chemicals, fuels, fuel oils, and water based media. Ideal for DEF/Urea/AdBlue. The ergonomically designed lever handle assures the user a firm grip for comfort, safer operation and increased leverage. The unique toggle mechanism design uses compound leverage for pumping with little effort while delivering a fast transfer of fluids. The LX-1328 delivers 16 oz. per stroke (8 strokes per gallon). The pump has multiple settings allowing the user to regulate between low, normal or high outflow. The 39" suction tube can fit 15 to 55 gallon drums. The heavy duty stainless steel (SS316) piston makes this pump durable. The non-drip valve is included as standard equipment with the LX-1328.
